

Caddie Retail

Since 1958, **Caddie**® has applied expertise and intelligence to design reliable high level products. Excellence, comes first and foremost from a no compromise approach to materials and products, as well as from the expertise of people who can offer every customer the best solution.

Founded in 1928, **Caddie**® is a worldwide well-known family company established in Drusenheim, Alsace. Historical partner of international retail, **Caddie**® is the French brand of reference. We offer quality equipment for retail and logistics.

The major retail trade has changed constantly in fifty years. At the same time, **Caddie**® has demonstrated its ability for constant change through greater personalization of the products based on observing users and the consumption experience.

From design to manufacturing, our experienced teams rely on 50 years of know-how to create the worldwide standards of equipment.

Our expertise is also to support our customers by deploying innovative customized solutions for each business line.

This exceptional approach helps to perpetuate the legend and confirm **Caddie**® status as a leading international partner of major retail outlets.

caddie[®]

caddie[®]

Caddie[®] French brand of reference (1957).

A synergy of industrial competences specialized in metal-plastic technologies. Based in Drusenheim, and located in Alsace since 1928.

Caddie brand is promoted worldwide thanks to a sales network with more than 130 offices.

In 2016, **Caddie** invested in a new production plant in Dettwiller.

Caddie[®] is part of the excellence of French know-how

Caddie received 2017 the label « Entreprise du Patrimoine Vivant » (EPV). This label is a mark of recognition of the French State, put in place to reward French companies for the excellence of their traditional and industrial know-how.

Quality

Production Process

The wire technique, know-how that built up the **Caddie**[®] reputation, is based on automated production processes designed especially by our teams and proven in the motor industry.

Our quality management system complies with the international standard ISO 9001:2015 which, combined with the production process repeatability, maintains a constant level of **Caddie**[®] quality for all our customers.

Quality control

Production compliance is assessed by passing each unit through a test bench before shipment:

Tests of mechanical strength, ergonomics, handling and safety criteria to ensure that customer needs are met along with the significant **Caddie**[®] quality requirement.

This guaranteed traceability throughout the life cycle means total control of all trolleys in service and monitoring of maintenance operations.

Research and Development

Design standards

Design standards are applied to guarantee the quality of **Caddie**[®] trolleys in terms of strength, ergonomics and safety in use.

Caddie[®] has used new technologies for its new Hybrid trolley. These call on performance criteria that extend beyond the trade's design standards. **Caddie**[®] is targeting sustainable customer satisfaction even for the new steel composite functionalities.

caddie[®]

Quality since 1928

Increasingly sensitive and concerned customers measure every purchase they make and demonstrate high standards for the services provided by the stores.

Caddie® solves these new challenges by giving consumption some meaning!

Caddie®, your reference partner makes its expertise and know-how available to optimise your performances. Recognised unanimously as one way of building up loyalty, the **Caddie**® trolleys and self-service accessories are designed to make them more convenient to use and thus meet the new consumer expectations.

BUILDING LOYALTY

Caddie.Emotion Creating a lasting relationship with your customers is a daily challenge for major retail outlets and loyalty.

An innovative, hybrid concept, anchored in modernity, that liberates shopping whilst promoting the store.

CADDIE.EMOTION

caddie[®]

Quality since 1928

DESIGN

An innovative design that creates emotion in capturing both original and differentiating identity. An elegant, dynamic line that carves the **Caddie.Emotion** identity and contributes to its expressive force.

A line and generous curves incorporating the bumpers.

MANOEUVRABILITY

Caddie.Emotion is a smart trolley that marries comfort and silence for a liberated and stress-free shopping experience.

Front and side *handles* harmoniously built into the top of the basket. RelaXt handle as an option for ergonomic grip.

COMFORT AND SILENCE

Providing a noble, warm positive contact with the consumer's senses.

Caddie.Emotion gives the consumer a feeling of well-being and harmony, to enhance purchasing mobility. A reference in terms of silent operation, **Caddie.Emotion** creates a peaceful purchasing atmosphere that encourages impulse buying.

The **Caddie.Emotion** trolley is compatible with a self-scanning checkout (see page 94).

«Reconquering» or «revitalising» town centres is the current trend.

The rise in fuel prices, changes in living styles and new consumer trends are making town centre neighbourhood shops attractive again; the car is therefore no longer a must.

The consumer is looking to shorten the journeys and save time on traditional activities like shopping but also expects a more personal, user-friendly relationship; values arising from the purchasing experience essentially in Europe.

This more mobile and better-informed consumer is sensitive to greater welcome and service and expects the choice in the town centre for greater loyalty.

To make predominantly food neighbourhood shopping easier, **Caddie**[®] has designed various solutions for small town centre retail outlets.

The new trolleys are redesigned to suit more frequent purchases and cope with less cumbersome volumes.

PRODUCT BENEFITS

The **Caddie.Drive** trolley is especially designed for order preparation purposes, making the handling of goods more ergonomic and thus reducing MSDs.

Optimum accessibility is ensured throughout the process. Improved manoeuvrability throughout the order preparation process, from picking to delivery.

As an additional service offered to customers, order preparation enhances your image. The Caddie Drive trolley offers ideal storage compartments for the protection and sorting of goods.

CADDIE.MODULO 8

Ref. 4 454 08 03
Nesting : 242 mm

PRODUCT BENEFITS

An extremely compact, manoeuvrable and convenient trolley.
Optimum pick up thanks to its four pivoting wheels (diameter 100 mm) and its weight of less than 20 kg.

CADDIE.FASTCART

Ref. 7 788 12 03
Nesting : 190 mm
10 nested trolleys: 1769 mm
Product with options

PRODUCT BENEFITS

Its rubber wheels are silent and relaxing for urban shopping.
The goods are distributed better and protected from damage caused by stacking thanks to its two baskets of 40 litres each.
To protect your investment, **Caddie®** has opted for long-lasting zinc-plated steel coating and colourless varnish.

DIY

Gardening

Cash & Carry

Your customer profiles and purchasing frequency vary tremendously. In self-service non-food retail outlets, consumer purchasing is less frequent and the notion of service therefore becomes crucial. These less frequent purchases assume that they are more involved and often more cumbersome

CADDIROC COATING

CADDIROC® COATING

CADDIROC®

Caddie® has developed and patented the Caddiroc coating. The Caddiroc coating offers three levels of protection. Even if the polyester coating is damaged, the anti-corrosion protection on the steel remains thanks to a layer of electrolytic zinc-plating with varnish followed by oven baking.

To protect the trolley from these everyday attacks, boost its aesthetics in helping to run the sales outlet and maintain its welcoming appearance for the customer. Unique in Europe, our streaming coating facilitates guarantee protection and sustainable aesthetic.

WITH THE CADDIROC COATING, YOUR CADDIE® TROLLEYS OFFER A LASTING APPEARANCE THAT STANDS OUT!

- Conveys the corporate identity and values of your store.
- Visual identification of functionalities with different Caddiroc coating colours.
- Withstands UV and bad weather.
- Reduces maintenance costs.
- Pleasant to touch.
